Project Title: VehicleCampus Company Name: Not Mentioned

Role: Developer

Languages/ Tools Used: Core Java,, Memcached, Html, jQuery (client side Scripting), Ajax, iText 5.3

Project Description:

VehicleCampus" is a web application which is mainly use by for vehicle seekers and vehicle dealers. VehicleCampus is our ongoing project it still in development phase. The idea behind vehicleCampus is just to show the organized Information to the Vehicle seekers about new vehicle like what the other choices are and which one is convenient for them. Vehicle seekers can directly contact to dealers or service centers from vehicleCampus. It is helpful application for vehicle owners too, like we show what to do if some problem occurs on the way. In this website we use jquery, ajax, jsps struts 2.0 framework and mysgl database server and we will implement it on Android, iOS and Blackberry platform.

Project Title: Job Portal

Company Name: Not Mentioned

Role: Developer

Languages/ Tools Used: Core Java, J2EE (Servlets and JSP's), Struts 2.0, Mysql, Tomcat 7.0, Memcached, Html,

jQuery (client side Scripting), Ajax, iText 5.3

Project Description:

Job Portal" is for job seekers and employers like "naukri.com". It list all the job which is posted by employers to our website. By using this website job seekers can easily search the job by their choice. Actually we are implementing nice filter criteria in it for efficient searching for job seekers and for employers to for searching the resumes. In this website we use jquery, Ajax, jsps struts 2.0 framework and mysql database server and I-text for automatic Pdf resume generation.

Company Name: Not Mentioned

Role: Developer

Languages/ Tools Used: Memcached, Html, jQuery (client side Scripting), Ajax, iText 5.3

Project Description:

Property Listing Web Application" is a project which lists all the new residential and commercial properties. This web Application is build on struts 2.0, JSP's and servlets with mysql database. This web Application is for the users who are searching the new properties and for builders who want to publish their properties in the market. This web Application track all the user sessions and appropriately send the notifications to the user and builders too regarding the property information. In this website we use jquery, Ajax, jsps struts 2.0 framework and mysql database server.

Project Title: XDBDocManager **Company Name:** Not Mentioned

Role: Developer

Languages/ Tools Used: Memcached, Html, jQuery (client side Scripting), Ajax, iText 5.3

Project Description:

XDBDocManager is a project which document the database schema in different formats Such as pdf, chm, html files. XDBDocManager is done for a software companies by which project managers, users, team leads can use our product. The solution is XDBDocManager. XDBDocManager gets the database information like username and password and port of the database and according to the database information, it read all the schema information and store it in XDBDocManager's database which we design in Mysql database server. For Front End we use JSPs for interacting to the users. JQuery and Ajax are used for event handling and backend request and response on pages. The whole application is build on Struts 2.0 framework. It supports multiple databases like Mysql, Oracle, Postgres, IBM DB2, Informix, Ms-sql etc.
